

A quick update...

PfSense Japanese Translation

- Started in January, 2014 as machine translation
 - I do not speak Japanese, my wife does :)
- Intention: Complete pfSense User Interface in Japanese
- Follows on the heels of the Brazilian Portuguese translation, (and great gettext integration)
- Initial attempts already “blessed”, and pulled into pfSense official repository

PfSense Japanese Translation (status report)

- Started in January, 2014 as machine translation
 - I do not speak Japanese, my wife does :)
- Finished with “sanity-check” corrections
- 1 MAJOR volunteer nearly done with Phase 2 pass
- 80% finished with “check and modify” phase
- Target next phase: March
 - Will need testers!
